

Pro Arch Mini Residency

A theory, live demonstration and hands on practice based course

From 22th to 24th of March

DESCRIPTION

This course is for colleagues already placing and/or restoring dental implants, who are interested in getting to know the basic principles of immediate and implant placement and implant loading following the STRAUMANN Pro Arch protocol.

The course focuses on the clinical (practical) aspects of implant dentistry. You will be able to see the cases from the planning till the reconstruction. Treatment planning, CBCT analysis and implant placement planning using a planning software, implant placement, prosthetic procedures, implant recall are on the list of the procedures. You will be able to see during your clinical stay at our clinic.

In addition short, very focused lectures will provide You with the essential theoretical background and useful practical tricks for Your daily practice.

COURSE OVERVIEW

- STRAUMANN Pro Arch Protocol
- Diagnostics, Implant planning and guide fabrication
- Immediate Implant Placement and provisionalisation
- Definitive Prosthetic Reconstruction
